# Contents

## Part I

# A part title in a book

# Chapter 1

## A chapter title in a part

### 1.1 A section title in a chapter

A text. Note that in a book document, chapters can start only on odd pages (*pagini cu numere impare*).

Pages are numbered automatically.

Parts, chapters and sections are numbered with distinct variables called counters.

The names of the counters are the same as the names of the sectioning commands, respectively :

- `part` for `\part`
- `chapter` for `\chapter`
- `section` for `\section`

## Chapter 2

# Another chapter title

### 2.1 Another section in another chapter

According to the text in section ?? in chapter ??,at page ?? ...

Note that sections are numbered with two digits: the first one for the chapter counter, the second one for the section counter.

## Part II

### Another title part

## Chapter 3

# A new chapter title
